

Sanitary & Storm Sewer Fittings

Sanitary & Storm sewer fittings allow for a tight, leak free connection of SDR 26 through 35

Gasketed sewer fabricated fittings are manufactured using the gasketed sewer pipe by thermoforming sections of pipe and gluing together. Fabricated fittings are available in 4" to 48" (100mm to 1,200mm) diameters. A complete line of fabricated gasketed sewer fittings are available, including tees, wyes, bends, sweeps, couplings, caps, increasers, saddles and cleanouts.

- Water tight joints mean virtually no risk of infiltration or leakage
- Corrosion and abrasion-resistant
- Smooth interior walls allow for higher flow rates
- Easy to handle and install
- Also available in Nitrile Gaskets for extra chemical resistance

Galaxy Plastics Ltd fabricated gasketed sewer fittings have been third party tested to CSA B182.2

Available from 4" to 48"

Sanitary & Storm Sewer Fittings

Fabricated Sewer fittings are manufactured from SDR 28 (sizes 4"–6") and SDR 35 (sizes 8"–48").

Fittings are manufactured using segments of sewer PVC pipe by bending, molding and assembling to create your fitting.

Galaxy Plastics Ltd Storm Sewer fittings employ a Reiber gasket. The steel reinforced Reiber gasket is locked in the socket bell to resist the effect known as "fish mouthing".

All Storm Sewer fittings are ASTM F477, ASTM D3212, CSA B182.2, and Profile CSA B182.2 approved.

- Water tight joints mean virtually no risk of infiltration or leakage
- Corrosion and abrasion-resistant
- Smooth interior walls allow for higher flow rates
