

EZ Tee

The easy way to a service connection on any mainline

The EZ Tee is a simple but effective method to connect laterals to multiple types of pipe (C900, DR35, Profile, Clay, Schedule Pipe, Concrete, etc.) to both existing and new pipe.

Galaxy Plastics EZ Tees are tough and resilient against root penetration, highly resistant to damage by impacts associated in normal field handling and our highly superior fittings are corrosion resistant and not affected by sewer gasses, chemicals and hydrogen sulphide acids normally found in domestic sewer effluent or legally discharged industrial fluids.

- Consisting of only three main parts. (Lateral PVC connection, EPDM rubber boot & stainless steel clamp)
- From sizes 200mm (8") through to 1,500mm (60")
- Accepting laterals 100mm (4") to 300mm (12")
- Easy installation, requiring only a cored hole.
- Lateral connections for Gasket, Both Open and Closed Profile and Solvent weld hubs.

EZ Tee

EZ Tee for a fast connection solution

For retrofit, the EZ Tee is possibly the best solution. Instead of cutting in a new tee or using conventional methods, a cored hole is the only requirement for the EZ Tee.

The EZ Tee is available for both Sewer and Open Profile from 8" to 60" on the main-line accepting 4" through 12" laterals. Larger sizes can be produced upon request. Call for further details.

Perfect for C900, DR35, Profile Pipe, Clay, HDPE, Concrete, Schedule Pipe, etc.

ITEM CODE	INCHES	MM	HOLE DIAMETER
EHS/04	4"	100	4.5"
EHS/06	6"	150	6.5"
EHS/08	8"	200	8.75"
EHS/10	10"	250	10.875"
EHS/12	12"	300	12.875"

1. Core hole (run drill in reverse)

2. Insert gasket

3. Lubricate the spigot end of the lateral connection

4. Insert lateral connection into gasket

5. Use a block of wood or a similar substitute to set the lateral connection

6. Tighten the stainless steel clamp to conclude the installation
